

The cable duct is used for structured cable management in the TiRAX-cabinet system with a width of 800 mm and will be mounted between 19" level and side wall.

It enables vertical cable management over the entire cabinet height and also provides best conditions for horizontal rack to rack cabling or cabling in front of the 19" level. Each height unit has a separate plastic cable guide.

product features

- structured, lateral cable management over the entire cabinet height
- knock-out cable openings for lateral and rear cable entry/exit (see back side position 3)
- stabilized front panel plastic cable clamp each to the defined cabling in front of the 19" level
- the front can be locked by a hinged cover
- additional cable fixings in the rear, pluggable cascading of the cable guides (see back side, position 2)
- no blocking of the airflow in the cabinet
- better overview of the cabinet
- symmetrical design (mountable in the cabinet on the right and on the left)

Material:

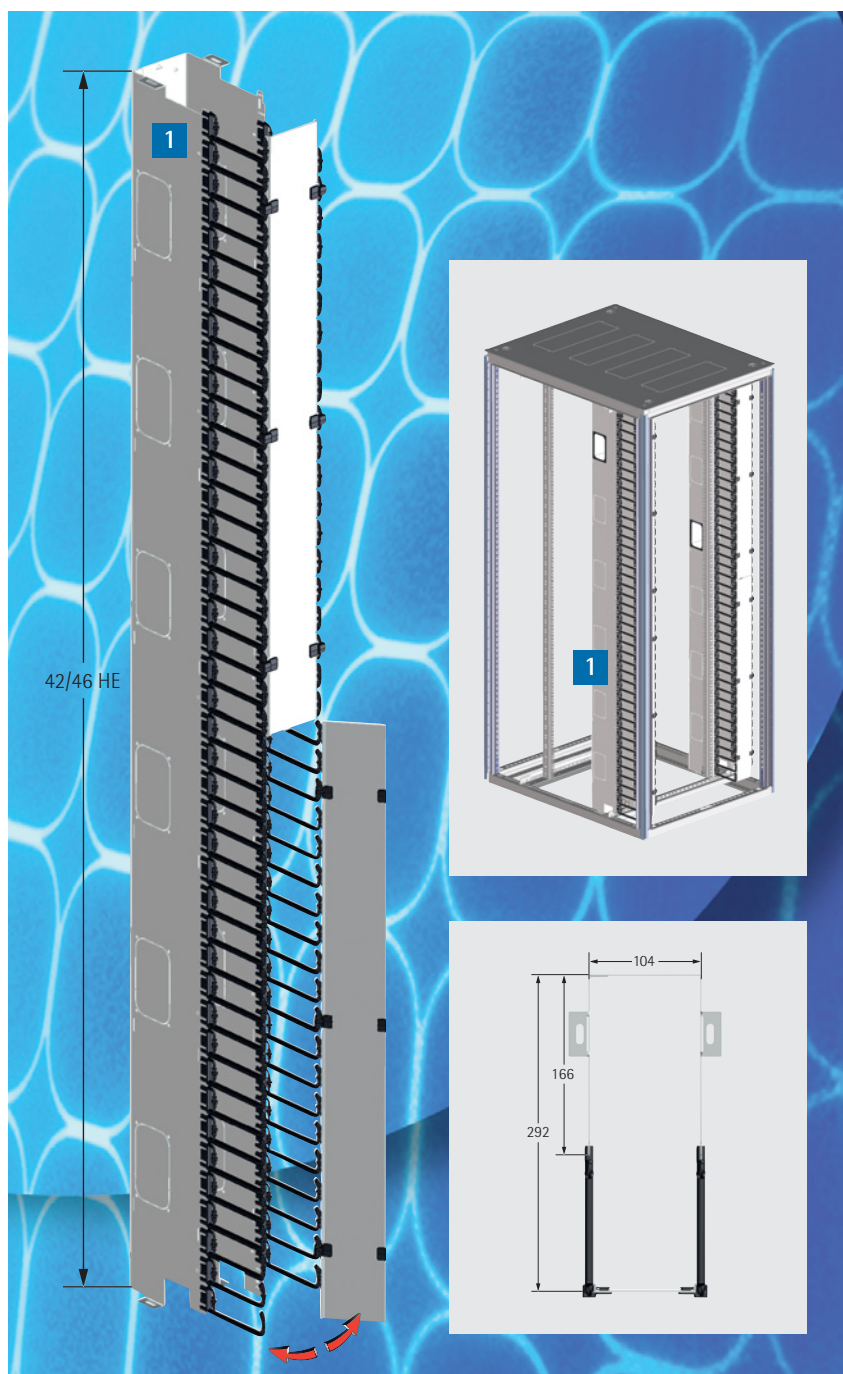

duct: sheet metal
hinged cover: aluminum
cable clamps and hinges:
plastic (UL94-V0), black

Finishing surface:

sheet panel: powder-coated in
RAL 7035 light grey or RAL 9005
deep black

Delivery:

1 piece (duct with cable clamps and drop shutter, incl. mounting material)
